CAREER OBJECTIVE

A motivated and dedicated Computer Science and Engineering student with a strong interest in Full-Stack Web Development and Software Engineering. Experienced in developing practical, user-focused applications using modern web technologies, databases, and RESTful APIs. Possesses strong problem-solving, analytical, teamwork, and communication skills, with a passion for learning emerging technologies and applying technical knowledge to real-world challenges. Seeking an opportunity to gain professional experience, contribute to impactful projects, and grow as a skilled software engineer.

EDUCATION

American International University-Bangladesh (AIUB)

Bachelor of Science in Computer Science & Engineering (CSE)

CGPA: 3.46 out of 4.00 | Final Semester

Relevant Coursework: Data Structures, Algorithms, Database Management, Web Development

Dhaka, Bangladesh

2023 – Present

Mirpur College, Dhaka

Higher Secondary School Certificate (HSC)

GPA: 4.33 out of 5.00

Dhaka, Bangladesh

2019 – 2021

Dhanmondi Govt. Boys High School

Secondary School Certificate (SSC)

GPA: 3.94 out of 5.00

Dhaka, Bangladesh

2014 – 2019

PROJECTS

Tech Trolley: Mobile Shop Inventory and Internal Sales Management System (*NestJS, NextJS, Tailwind CSS, TypeORM, PostgreSQL, REST API, Swagger*)

September 2026 [\[GitHub\]](#)

[\[Tech Trolley Live\]](#)

- Developed a centralized, role-based web application for managing mobile shop inventory, purchases, sales, customers, suppliers, financial accounts, and operational expenses.
- Implemented separate access permissions for Owner, Manager, and Salesperson roles to protect sensitive financial and operational information.
- Implemented IMEI and serial-number tracking to monitor individual devices and their stock status.
- Developed REST APIs using NestJS and TypeORM with PostgreSQL as the relational database.
- Documented and tested API endpoints using Swagger/OpenAPI.

TrolleyHub: A Centralized Inventory and Sales Management System

September 2026 [\[GitHub\]](#)

- Developed a comprehensive Software Requirements Specification (SRS) for a centralized inventory and sales management system.
- Defined functional and non-functional requirements for authentication, inventory and IMEI tracking, purchases, sales, payments, financial accounts, and reporting.
- Designed Use Case, Activity, and ER diagrams to model system workflows, user interactions, and database relationships.
- Planned a 19-week Waterfall SDLC and managed project phases, task assignments, schedules, and deliverables using Jira.
- Prepared testing, deployment, marketing, and cost-profit analysis as part of the complete software engineering project plan.

Programming Contest Management System (PCMS) (*PHP, Oracle Database, JavaScript, PL/SQL, MVC*)

September 2026 [\[GitHub\]](#)

- Developed a role-based programming contest management web application for Participants, Organizers, and Administrators.
- Implemented contest registration, problem management, submission tracking, leaderboards, announcements, and user management with role-based access control.
- Designed and integrated an Oracle relational database with PHP and PL/SQL while following an MVC-style architecture.
- Prepared complete project documentation including system requirements, database design, ER diagrams, implementation details, and testing documentation.

Online Computer Shop (*HTML, CSS, JavaScript, PHP, AJAX, MySQL*)

May 2026 [\[GitHub\]](#)

- Developed a full-stack e-commerce application with authentication, product management, shopping cart, reviews, and order processing.
- Implemented dynamic search and filtering using AJAX and JSON.
- Designed and maintained a MySQL database with secure CRUD operations.
- Applied MVC architecture, session management, password hashing, and responsive UI design.
- Used Git/GitHub for collaborative development and version control.

- Developed a micro-freelancing platform as part of Software Quality and Testing course with focus on quality assurance.
- Applied Agile Scrum methodology for project management and documentation.
- Performed test case design, bug tracking, and quality reporting using Jira and Trello.
- Managed project documentation including meeting minutes, test reports, and user guides.
- Created UI/UX prototypes using Figma and managed version control with Git.

Shop Management System (C#, .NET Framework, SQL Server)

January 2025 [GitHub]

- Developed a desktop-based shop management application for inventory, sales, customer, and billing management.
- Implemented secure authentication, CRUD operations, and database integration using C# and SQL Server.
- Generated sales reports and automated daily shop operations to improve efficiency and data accuracy.
- Applied OOP principles and designed a user-friendly interface for seamless system management.

Train Journey Simulation (C++, OpenGL, GLUT)

May 2025 [GitHub]

- Developed a graphics-based animation project simulating a train journey through a dynamic countryside environment.
- Implemented real-time animations including moving trains, clouds, ships, and speedboats with day-to-night transitions.
- Designed interactive scenic elements such as mountains, rivers, a castle, and a lighthouse using OpenGL and GLUT.
- Applied computer graphics, animation, and transformation techniques to create an engaging visual experience.

Online Train Ticket Reservation System (Oracle SQL Express, MySQL, Database Management)

May 2024 [GitHub]

- Developed a database-driven train ticket reservation system for booking, cancellation, and seat management.
- Designed and managed relational databases using Oracle SQL Express and MySQL with optimized SQL queries.
- Implemented passenger, train, and reservation record management while ensuring data integrity and consistency.
- Automated reservation workflows to improve efficiency and reduce manual operations.

Computer Accessories Shop (Java, OOP)

January 2024 [GitHub]

- Developed a desktop-based computer shop application featuring user authentication, product management, and order processing.
- Implemented admin and customer dashboards, category management, and a custom PC Builder module.
- Designed an interactive GUI using Java Swing and applied OOP principles for modular development.
- Integrated payment workflows and automated shop operations to enhance user experience and efficiency.

TECHNICAL SKILLS

Programming Languages:	Python, PHP, Java, C, C++, C#
Frontend Technologies:	HTML5, CSS3, JavaScript, TypeScript, Tailwind CSS, React.js, Next.js
Backend Technologies:	NestJS, REST API, AJAX, JSON, TypeORM
Testing & API Tools:	Postman, Swagger/OpenAPI
Version Control:	Git, GitHub
UI/UX & Design:	Figma, Google Stitch, Canva, UI/UX Design, Responsive Web Design
Databases:	MySQL, Oracle Database, PostgreSQL, Microsoft SQL Server
Development & Other Tools:	Google Colab, Microsoft Office, Overleaf, Multisim, UML, AutoCAD

CERTIFICATIONS & WORKSHOPS

- **From Idea to Paper: A Guided Research Writing Workshop** (Aug 2025)
AIUB Research & Development Club. Guided by Prof. Dr. S.A.M. Manzur H. Khan & Dr. Prodhan Mahbub Ibna Seraj.
- **The AI Literacy Workshop** (Nov 2025) – Institute for Global Cooperation Foundation
Signed by Executive Director Shama Obaed and Chairman Mahmudur Rahman.
- **IT Essentials: PC Hardware and Software** (Jun 2023) – CISCO Networking Academy
PC hardware components and software troubleshooting.
